GRAIN MARKETS REMAIN MIXED

A mixed trend continued to rule cash grain markets during the holiday-shortened week ended July 1. Wheat, oats and barley strengthened, while most other grains closed unchanged or lower. Trading remained spotty.

Firmness in wheat reflected fairly good domestic and export demand for relatively light offerings. Adequate storage in the Southwest encouraged a strong producer holding policy whenever cash wheat prices dropped below net support prices. Excellent export demand in the soft wheat area stemmed from the drying up of hard wheat sales in the Southwest and a holding tendency on the part of some soft wheat producers. Spring wheat gained 3¢ per bushel but Durum closed unchanged at Minneapolis. White wheat, on the other hand, declined 1-3¢ at Portland on a further adjustment to a new-crop basis. Trading was light with limited domestic buying interest and slack export demand. Rye held steady in a mostly nominal market at Minneapolis.

Cash corn finished 1-2¢ per bushel lower at principal markets as offerings were fully adequate for both domestic and export trade needs. Oats and barley closed unchanged to around 3¢ higher with strength attributed to reports of some crop damage and to fairly good demand for relatively light offerings. Grain sorghum prices broke 13¢ per cwt. at Fort Worth and slipped 1-2¢ at Kansas City. The sharp drop at Fort Worth reflected excellent crop prospects and limited trading as most buyers awaited lower-priced new-crop offerings.

Soybeans held firm in relatively quiet trading. Flaxseed, influenced by the drop in futures prices, closed 5¢ per bushel lower at Minneapolis.

IWA SALES: Sales of wheat and flour under the International Wheat Agreement Program during the week ending June 30 totaled 529,000 bushels. This brought sales for the season to date to 80.6 million bushels compared with 88.2 million a year earlier. Balance remaining for sale under this season's quota is 48.2 million bushels as against 40.2 million a year ago.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats, or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

1/ Carlot receipts have been converted to bushels on the basis that 1 carlot equals 1,750 bushels.

2/ Of the May receipts, 400 bushels were Black, and the remainder Yellow soybeans. Inspections of soybeans in May included 5,084,000 bushels as cargo lots, 1,550,675 bushels as truck receipts, and the balance as carlot receipts

Based on reports of inspections by licensed grain inspectors at all markets.

Average prices received by farmers, effective parity, and support rates
(Dollars per bushel except grain sorghums per cwt.)

GRAIN MARKETS IRREGULAR

Cash grain markets continued to show a mixed price trend during the week ended July 9. Trading was generally light.

Winter wheat ruled firm at principal markets but weakened at Kansas City. Firmness reflected the holding tendency of southwest producers, ample storage space, good demand, and light offerings. Domestic mills and exporters actively competed for available spot supplies. Spring wheat dropped 5¢ per bushel and durum wheat was off 2¢ at Minneapolis. Lack of export demand, nearness of new-crop supplies, and favorable crop news were the main weakening influences. Soft white wheat eased off about 2¢ on a further adjustment to a new-crop basis at Portland. Demand was limited despite light offerings. Rye strengthened slightly at Minneapolis.

Corn, influenced by prospects for a good crop, ample supplies, and lagging demand closed 1-5¢ per bushel lower at principal markets. Oats found limited demand and markets weakened slightly largely in sympathy with the downturn in corn. Barley, on the other hand, finished stronger, reflecting active domestic and export demand for light offerings. Grain sorghums advanced 4-6¢ per cwt. behind good demand for small supplies at Kansas City but held steady with limited demand for increased offerings at Ft. Worth.

Oilseed markets were irregular. Soybeans lost 4¢ per bushel at Chicago, but both soybeans and flaxseed held steady at Minneapolis this week. Trading was quiet as crushers showed little buying interest.

NATIONAL AVERAGE 1959 WHEAT SUPPORT PRICE: National average support price for 1959-crop wheat will be \$1.81 per bushel -- unchanged from the minimum "advance" support price announced May 1, 1958. Minimum 1959 terminal and county wheat price support rates announced March 2, 1959 also are unchanged.

MINIMUM 1960 WHEAT SUPPORT PRICE: An "advance" minimum national average support price of \$1.77 per bushel has been announced for 1960-crop wheat, if marketing quotas are approved by producers in the July 23 referendum. The advance support price reflects 75 percent of the estimated parity price for wheat as of the beginning of the 1960-61 marketing year on July 1, 1960. This level of support is indicated on the basis of estimated wheat supplies (207.6 percent of the normal supply) available for the marketing year.

CORN AND SOYBEAN PRICE SUPPORT ACTIVITY: A supplemental report issued July 8 showed that 376.2 million bushels of 1958-crop corn had been put under price-support loans and purchase agreements through June 15, 1959. This compares with 365.3 million bushels of 1957-crop corn put under support as of June 15, 1958, and 475.8 million bushels of 1956-crop corn as of June 15, 1957. Of the total 376.2 million bushels of 1958-crop corn put under support through June 15, 1959, 150.4 million bushels or about 40 percent came from farms not in compliance with 1958 acreage allotments. Of the total, 327.3 million bushels were under farm-stored loans, 14.5 million under warehouse-stored loans, and 34.4 under purchase agreements. Farmers put a total of 140.5 million bushels of 1958-crop soybeans under price support loans and purchase agreements as of June 15, 1959. Of these, farmers repaid loans covering nearly 37 million bushels and had delivered almost 50.9 million bushels to CCC in payment of loans.

IWA SALES: Sales of wheat and flour under the International Wheat Agreement Program during the week ended July 7 totaled 218,000 bushels. This brought sales for the season to date to 80.8 million bushels compared with 88.5 million a year earlier. Balance remaining for sale under this season's quota is 47.9 million bushels as against 40 million a year ago.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats, or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

CORN ADVANCES - OTHER GRAINS FIRM

Corn and spring wheat advanced while most other cash grains generally held firm during the week ended July 16.

Winter wheat fluctuated within a narrow range but closed virtually unchanged from a week earlier. Offerings were relatively light but appeared ample for limited domestic and export demand. Spring wheat, influenced by light receipts and some export inquiry, finished 5-6¢ per bushel higher at Minneapolis. Durum wheat went up 1-2¢ and found ready outlets. Soft white wheat slipped 2¢ behind slow demand but hard white held steady on limited supplies at Portland. Rye, bolstered by light receipts, forecast of a smaller crop and acceptance of export bids, closed 3¢ higher at Minneapolis.

Cash corn closed 2-5¢ per bushel higher at principal markets. Strength was attributed to active domestic and export demand for only moderate offerings and lack of moisture in important growing areas. Oats held a firm position partly as a result of predictions for a smaller crop this year. Barley was generally unchanged with continued good domestic and export demand for moderate offerings. Grain sorghums went up 3-6¢ per cwt. behind aggressive demand for meager offerings at Kansas City but declined 2¢ at Fort Worth as buyers continued to await volume new-crop movement.

Oilseed markets closed about unchanged. Earlier strength stemming from dryness in producing areas and the forecast of smaller acreages was about offset by late-week showers.

GREAT LAKES EXPORTS: U. S. grain exports by way of the St. Lawrence Seaway and shipments to Canada since the opening of navigation (around the end of April) through July 10 totaled about 57 million bushels. This is 29 percent of the 194-million-bushel total U. S. grain exports during that period. Of the Great Lakes shipments, 22 million bushels or 39 percent went to Canada for consumption or for storage pending later overseas shipment. No information is available on the quantity or destination of grain reshipped from Canadian ports. Great Lakes shipments by grains in million bushels were: Wheat 4.3; corn 21.3; oats 11.6; barley 10.6; rye 0.4; soybeans 5.6; and flaxseed 2.7.

IWA SALES: Sales of wheat and flour under the International Wheat Agreement 1958-59 Program during the week ended July 14 totaled 277,000 bushels. This brought sales for the season to date to 81.1 million bushels compared with 88.7 million a year earlier. Balance remaining for sale under this season's quota is 47.6 million bushels as against 39.8 million a year ago. Also, 20.6 million bushels of wheat and flour had been sold under the 1959-60 IWA program through July 14.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

COMMODITY CREDIT CORPORATION INVENTORY AND SALES

SPRING WHEAT DROPS - OTHER GRAINS SHOW SMALL CHANGES

Spring wheat dropped sharply to a new crop basis while other grains generally fluctuated within a narrow range during the week ended July 23.

Winter wheat was unchanged to 1¢ per bushel higher. Offerings were relatively light but appeared ample for the limited domestic and export demand. Spring wheat dropped 6-8¢ per bushel at Minneapolis, influenced by new-crop arrivals of winter wheat, slow flour business and adequate supplies to last until new crop arrives in volume. Durum prices held steady with a fair demand for the light receipts. White wheat at Portland was mostly unchanged with a moderate demand for increased offerings. The rye market was dull with light offerings and prices unchanged from a week ago.

Cash corn fluctuated within a narrow range and closed with a mixed trend. General rains in the Midwest which brought relief to many areas proved a weakening factor. Light offerings about offset the weakness and prices ranged from 1¢ lower to about 1¢ higher at the principal markets. Oats prices followed the corn pattern with a fairly good demand for increased offerings. Malting barley dropped 7¢ at Minneapolis in a shift to a new crop basis but feeding barley was about unchanged. Grain sorghums were about steady at Kansas City but dropped 5¢ per cwt. at Fort Worth with increased offerings. Harvesting of the new crop progressed rapidly with large supplies moving to market.

Oilseed markets were unchanged to weaker with limited demand for light offerings. Soybeans were unchanged to 3¢ lower with rains in the Midwest improving crop prospects. The flaxseed market was unchanged from a week ago at Minneapolis.

INSPECTION REQUIREMENTS AT CANADIAN PORTS: Exports of U. S. grain under all export subsidy programs including P. L. 480, Title I, will be permitted after September 1, 1959, from Canadian ports on the St. Lawrence Seaway only if U. S. inspection is obtained at such ports.

This action, requiring U. S. inspection at Canadian Seaway ports, will apply to exports under the feed grain and wheat payment-in-kind programs and to CCC sales, including those under barter and the CCC credit sales programs and those made at special export pricing.

The service will be provided on a fee basis upon request of interested parties. Inspection and certification will be on the basis of U. S. official grain standards.

1/Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

1/ Estimates of the Crop Reporting Board.

2/ Commercial stocks reported by Grain Division, AMS, at 45 Terminal cities.

3/ Owned by CCC and stored in bins or other storages owned or controlled by CCC; other CCC-owned grain is included in the estimates by positions.

4/ All off-farm storages not otherwise designated, including merchant mills.

5/ 1956-57 average.

6/ Firms reporting crushings and stocks of soybeans to the Bureau of the Census.

Grains: CCC-owned stocks, June 30, 1959
(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

1/ No program.

2/ In process, no data available.

Through June 30 farmers have placed a little over 22 million bushels of 1959-crop wheat under price support. Of this, 8.5 million were put under support in Kansas, 10.9 million in Oklahoma and 1.6 million in Texas. Through June about 2.5 million bushels of 1959-crop barley were under support with the most of it in Arizona, California, Kansas and Oklahoma. Farmers had also put 429,431 bushels of 1959-crop oats under support by the end of June. Of the total of 381 million 1958-crop corn put under support, 152 million or about 40 percent was put under at the noncompliance rate.

UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 2 No. 3

Washington 25, D. C.

July 29, 1959

Grain markets generally weakened during July as harvesting of the new crop grains became general and prospects pointed to a record corn crop. Winter wheat dropped 6-10¢ per bushel at the principal markets in June but this was less than the sharp drop of 30-40¢ of a year earlier. Corn prices dropped 3¢ during July while oats were about steady. Other grains generally lost ground during June and July reflecting a generally slow demand for near record supplies.

Wheat prices were mostly steady during July and generally averaged above a year ago. The smaller crop, increased storage facilities and about unchanged price support rates were steadying factors in the winter wheat market. Spring wheat started to adjust to a new-crop basis in July this year while last year the big drop was in early August. Spring wheat prices at the third week of July were 6-18¢ below a year earlier, while durum wheat stood at last year's level. Domestic wheat supplies for 1959-60, currently estimated at 2,432 million bushels, are 90 million above last year and 520 million above the 5-year 1953-58 average. The larger supplies for this season reflect the record carryover of 1,277 million bushels. This is an increase of nearly 400 million over July 1 stocks a year ago and 241 million above the previous record on July 1, 1955. Disappearance last season at 1,074 million bushels was the second largest in recent years - 85 million above 1957-58 but 62 million below 1956-57. Exports of wheat and flour increased sharply over last year and totaled 443 million bushels compared with 402 million in 1957-58 and 550 million in 1956-57. Exports from the four principal exporting countries (United States, Canada, Argentina and Australia) totaled nearly 910 million bushels during the year ended June 30, 1959 as against 853 million the previous crop year. Lower Canadian exports were more than offset by larger exports in the other countries.

Rye prices dropped 4¢ per bushel during July or about the same as last year. Rye at Minneapolis averaged about 20¢ above the effective support the third week of July while a year earlier prices were at support. Domestic supplies of rye for 1959-60 are estimated at 34 million bushels on the basis of July 1 conditions. This is 8 million less than supplies for 1958-59 and nearly 3 million below the 5-year average. Disappearance of rye last season was 32.8 million bushels - 5 million above 1957-58 and the second largest in recent years. Exports of nearly 9 million were double those of the previous season while usage for feed and alcohol were both above last year. Millings for flour continue to decrease with this year's total the smallest of record.

Corn prices in July averaged around 8¢ per bushel below July 1958 with the largest corn crop of record indicated. Conditions at the first of July pointed to the first crop over 4 billion bushels. A 14 percent increase in the planted acreage and a near-record yield of 50 bushels per acre were indicated July 1.

Stocks on July 1 of 2,204 million bushels were 5 percent above last year. Disappearance of corn, grain only, totaled 2.7 billion bushels the first 9 months - 300 million more than last season and the largest of record. Exports of 159 million and wet corn milling of 112 million were both record highs. Nearly 2.4 billion bushels of corn were fed the first three quarters an increase of 13 percent over last season. Corn as grain fed per animal unit totaled 13.5 bushels the first 9 months as against 12.7 last year and 11.8 the 5-year average.

Oats prices were generally steady during July and averaged around 3¢ per bushel above a year ago. Domestic supplies for 1959-60 total 1,379 million bushels on the basis of July 1 prospects. This compares with 1,747 million for 1958-59 and 1,579 million the 5-year average. The smallest oats crop since 1939 was forecast July 1 with the estimate placed at 1,010 million bushels. Carryover stocks were the largest of record and totaled 369 million bushels. Disappearance of oats during the 1958-59 season at 1,381 million bushels were about 140 million more than in 1957-58 due to heavier feeding and record exports. Exports were 17 percent and feed 12 percent above last year.

Barley markets weakened during July with prices averaging 5-7¢ below a year ago. A smaller export demand and lower support levels are principal factors in the lower prices this year. Domestic supplies of barley for 1959-60 total 607 million bushels and are 32 million below the record of a year ago but nearly 140 million above the 5-year average. Barley stocks of 193 million on July 1 were 15 percent above the previous record July 1, 1958. July 1 conditions indicate a 1959 crop of 414 million bushels - 12 percent below the 1958 record high but 30 percent above average. Record exports and heavy feedings boosted total disappearance to 457 million bushels - 40 million above 1957-58. Exports of 112 million were sharply above last year and double the average. Over 226 million bushels were fed last season as against 215 million the previous year.

Grain sorghum prices generally averaged above last season until July when prospects of new supplies and a less active foreign demand reversed the trend. No. 2 Yellow Milo dropped nearly 20¢ the first 3 weeks of July at Fort Worth where new-crop supplies began to arrive. Stocks of grain sorghums on July 1 totaled 296 million cwt. - 104 million above last year. Disappearance the first 9 months totaled 221 million cwt. this season as against 168 million cwt. the same months last season. Exports of nearly 40 million are about double those of last year and the largest of record.

Soybean markets have generally averaged below last year reflecting lower oil and meal prices. July soybean prices averaged around 5¢ per bushel below a year earlier. Stocks of 157 million on July 1 were 50 million above last year. Disappearance was up sharply with both crushings and exports at record levels. Crushings of 312 million the first 9 months were 45 million above and exports of over 88 million were 17 million above the comparable period a year earlier. Exports of soybean oil were slightly above last year's total of 543 million pounds. An 8 percent reduction in the 1959 acreage was indicated in the July report as compared with 1958.

Flaxseed averaged \$2.95 per bushel at Minneapolis during July as against \$3.19 a year earlier. Supplies of 42.5 million bushels indicated July 1 for 1959-60 are 5.8 million less than for 1958-59. Carryover stocks of 14.9 million bushels are 71 percent above last year and the second largest since 1950. The 1959 crop was forecast at 27.6 million bushels on July 1 - 30 percent below average. Crushings for oil last season were the smallest since 1934 and totaled 22.4 million bushels.

Source: Data on stocks, production and seed usage from Crop Reporting Board; imports, exports, and quantity of wheat, rye, soybeans and flaxseed processed from Census Bureau, and alcohol usage from Internal Revenue Service.

1/ Owned and stored in bins or other storage owned or controlled by CCC.
Additional CCC-owned grain is included in other positions.

2/ All off-farm storages not otherwise designated, including merchant mills.

3/ Mostly quantity fed, but includes corn for dry milling and farm household use currently estimated at 95 million bushels annually. Also includes waste, loss and statistical errors in estimates.

1/ October 1 stocks in all positions include only old-crop soybeans.

2/ Owned and stored in bins or other storage owned or controlled by CCC. Additional CCC-owned grain is included in other positions.

3/ All off-farm storages not otherwise designated.

4/ Exports minus imports which are negligible.

5/ Mostly quantity fed, but includes waste, loss and statistical errors in estimates.

^{1/} Includes stocks sold but not delivered.

^{2/} Includes both purchase agreements and quantities put under loan.

^{3/} Reported as of June 30, 1959. Does not include the following quantities of grain resealed; Wheat 39,291,969; oats 20,687,706; barley 15,166,007; rye 1,353,026; flaxseed 1,034,628; soybeans 4,425,522 bushels and grain sorghums 6,144,343 cwt.

^{4/} Total deliveries reported through May 31, 1959. May not include all grains delivered from 1957 reseed program and does not include following grains reported June 30, 1959 under extended farm-stored reseed: Wheat 5,790,371; barley 6,710,497; oats 5,584,739 bushels and 1,011,061 cwt. grain sorghums.

^{5/} The principal deliveries from the 1958 corn support program will be made after July 31, the date when loan deliveries are due. Therefore, July 1 inventory includes only a small quantity of take-over from the current crop.

July 31, 1959

GRAIN MARKETS MIXED

Winter wheat markets strengthened while spring wheat and grain sorghums weakened and other grains fluctuated within a narrow range during the week ended July 30.

Winter wheat advanced 2-3¢ per bushel at the principal markets. Offerings remained light with fair domestic and export demand. Spring wheat prices were unchanged to 4¢ lower with the biggest loss in high protein types. Price weakness reflects increased arrivals of new-crop wheat and continued slow flour business. Durum wheat markets were firm with light receipts as harvesting was just getting started in North Dakota. White wheat was mostly unchanged in the Pacific Northwest with moderate offerings of the new crop harvest. Rye advanced 2¢ per bushel in Minneapolis in light trading.

Corn was mostly steady during the week and price changes held to narrow limits. Demand was fair for light offerings but continued good crop prospects was an offsetting factor. Oats were mostly unchanged with a fair demand for limited offerings. Barley dropped 2-5¢ at midwestern markets reflecting expanded marketings but was generally firm in the Pacific Northwest. Grain sorghums dropped 9¢ per cwt. at Fort Worth reflecting increased marketing and the truck embargo at Corpus Christi. Prices were firm at Kansas City with small offerings.

Oilseed markets were steady in light trading. Reduced crushings, increased processors' stocks and expected large carryover were weakening factors in the soybean market. These were about offset by the smaller acreage and the continued large exports and prices closed about unchanged. The flaxseed market was unchanged from a week ago at Minneapolis.

1/ Carlot receipts have been converted to bushels on the basis that 1 carlot equals 1,750 bushels.

2/ Of the June receipts, all were Yellow soybeans. Inspections of soybeans in June included 5,886,026 bushels as cargo lots, 2,110,343 bushels as truck receipts and the balance as carlot receipts.

Based on reports of inspections by licensed grain inspectors at all markets.

Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth. Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

GRAIN MARKETS IRREGULAR

Most cash grains showed little or no price change during the week ended August 6, but flaxseed advanced sharply while grain sorghums and soybeans weakened.

Winter wheat, influenced by increased flour buying and fairly good export demand, edged forward 1-2¢ per bushel. Spring wheat also drew support from improved flour and export trade and finished 2¢ higher at Minneapolis. Durum wheat was unchanged. Hard white wheat was unchanged but soft white was down 1-2¢ at Portland as offerings increased and export demand slowed. Rye held steady at Minneapolis.

Feed grain markets were relatively quiet. Offerings appeared ample for current domestic and export demand. Corn, oats and barley prices fluctuated within a narrow range but closed generally unchanged from the previous week. Grain sorghum prices, on the other hand, dropped 8¢ per cwt. under pressure from new-crop supplies.

Weakness in soybeans was attributed partly to rains in some producing areas and to lower markets for oil and meal. Flaxseed, influenced by a higher futures market, dryness in major producing areas, and fairly strong export demand, advanced 25¢ per bushel in Minneapolis.

| Wheat and flour, U.S. exports by country of destination, 1957-58 and 1958-59 | 15-16 |

RYE IMPORT RESTRICTIONS: Imports of rye were limited by Presidential proclamation August 5 to 3.3 million bushels for each of the 1959-60 and 1960-61 seasons. As in previous years, all but 2 percent of the quota was allotted to Canada. No quota was in effect during July 1 to August 5 when about 2.7 million bushels were imported. Of the 120,000-bushel quota for August 5-31, all was admitted the first day of the quota period. The quota for September 1, 1959 to June 30, 1960 is 1,382,138 bushels. The 1960-61 quota year will be from July 1 to June 30.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

CANADIAN GRAIN IMPORTED OR SHIPPED INTO THE UNITED STATES

| PERIOD | WHEAT IMPORTED | | GRAIN SHIPPED TO THE U. S. ^{1/} | | |
|-----------------|-----------------------------------|--------------------------------------|--|-----------|-----------|

GRAIN MARKETS MIXED

Corn, grain sorghum and soybean prices followed a lower trend but most other cash grains showed little or no change during the week ended August 13. Weakness in corn, sorghums and soybeans generally reflected the record corn crop and well above average sorghum and soybean crops.

Winter wheat fluctuated within a narrow range and closed about steady. Marketings were lighter with many producers holding their wheat. Offerings were light but about adequate for fairly good domestic and export demand. Spring wheat strengthened on ordinary through 13 percent protein types but 15 percent protein was down 4¢ per bushel at Minneapolis as premiums were adjusted in line with increased delivery of this year's high-protein spring wheat crop. Durum wheat, however, closed 6-7¢ higher as recent dry weather hurt the crop in some producing areas. White wheat, influenced by expanded offerings and slack export demand, weakened in Portland. Rye closed firm at Minneapolis.

Corn went down 1-3¢ per bushel at most markets as demand slacked off and buying was held largely to immediate needs in view of prospects for a record new crop. Oats and barley finished in a weak position despite relatively light offerings and fairly steady demand. Much of the weakness was in sympathy with lower corn and grain sorghum markets. Malting barley, however, went up 6¢ behind aggressive demand at Minneapolis. Grain sorghums remained under pressure from expanding new-crop offerings and light demand. Prices were down 13¢ per cwt. at Kansas City and 2¢ at Fort Worth.

Soybeans finished 2-3¢ per bushel lower as the crop report, although below last year, was slightly above trade expectations. Other weakening influences were light demand, softer soybean oil and meal markets, and prospects for more competition from cottonseed meal as a result of this year's larger cotton crop. Flaxseed, influenced mainly by a smaller crop estimate, advanced 5¢ at Minneapolis.

INSPECTIONS FOR EXPORT: Grain movement has followed a different pattern since the St. Lawrence Seaway opened. Inspections for export through the Gulf and the Great Lakes via the Seaway during May, June and July increased, while inspections at Pacific and Atlantic ports decreased. Inspections of grains for export from all ports May through July this year totaled 257 million bushels - 32 percent above the 194 million inspected a year earlier. Of the total, 133 million bushels or 35 million more than the year before went out from the Gulf. Most of this increase was in wheat, corn and soybeans. Exports through the Great Lakes reached 72 million bushels as against 7 million a year earlier. Of these, nearly 30 million bushels were oats and barley which moved directly from Lake ports to their European destinations probably because they are lighter and fill the boat without need of further topping. Most soybeans and about half of the corn inspected for export through Great Lakes ports either stayed in Canada or the destination was not known at the time of inspection. Exports from Pacific ports dropped to 27 million bushels during May through July -- 20 million less than a year earlier while inspections at Atlantic ports were down to 25 million bushels -- 18 million less than a year ago. Most of the drop on the Pacific Coast was in barley as inspections were only about a third of the previous year's total. Although inspections of oats, barley, rye and corn in Atlantic ports were down this year, exports of 20.6 million bushels of wheat were up 5 million and exports of 1.7 million bushels of soybeans ran nearly four times larger than a year earlier.

Grains: Inspections for export by coastal areas and through Great Lakes,
May, June and July, 1958 and 1959

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

1/ Production in all States.

2/ Imports and exports of Durum wheat not separately reported by U. S. Bureau of Census. Imports are based on Canadian shipments to the U. S. and exports on inspections for export.

3/ Compiled from mill reports.

4/ Includes quantity used for feed and cereals. Also includes waste, loss, and statistical errors of estimates.

5/ Estimated on the basis of incomplete data.

August 21, 1959

GRAIN MARKETS DULL WITH NARROW PRICE CHANGES

Most cash grain markets showed little or no price change during the week ended August 20. Trading was generally limited by light offerings except in the spring wheat markets where new crop supplies met a good demand.

Winter wheat fluctuated within a narrow range and closed about steady. Marketings were light with receipts at Kansas City well below average. The fairly good export and domestic demand readily absorbed the limited offerings. Trading in spring wheat was active with flour sales at a good rate and arrivals of new crop wheat at about the season's peak. Ordinary protein wheat was unchanged to 1¢ higher while 15 percent protein declined 2¢ per bushel during the week. Although much of the durum crop has been harvested, receipts continue light and prices were about unchanged. Trading in White wheat at Portland was slow with little change in prices. The rye market weakened with prices 2¢ below a week ago.

Corn markets were mixed with light supplies adequate for the slow demand. Corn gained 2¢ per bushel at Chicago, declined 2¢ at Minneapolis but was about unchanged at other markets.

The oats markets were dull and closed mostly unchanged. Trading in barley was active in Minneapolis with markets generally steady at other points. Demand was generally good for limited offerings of grain sorghums and prices were mostly unchanged.

With favorable weather and outlook for early harvest, soybeans weakened in light trading. Prices were mostly 1-2¢ per bushel lower. Flaxseed was unchanged at Minneapolis.

| Wheat - quantity ground for flour production, monthly..... | 10 |
| Wheat - amount under price support by States..... | 11 |
| Grains - amount under price support..... | 12 |

PRICE SUPPORT OPERATIONS: Through July 31 farmers put 107.7 million bushels of 1959-crop wheat under price support. This is about the same as the 107 million bushels of the 1958-crop put under by July 25, 1958. As in other years most of the early loans were made in Kansas, Oklahoma and Texas. Only 1.5 million bushels of oats were put under support as against 8.3 million a year earlier. Farmers put 3.9 million bushels of barley under support this year compared with 7.7 million by July 25, 1958.

CANADIAN GRAIN STOCKS: Carryover stocks of Canadian wheat on July 31 totaled 546.3 million bushels this year, according to the Dominion Bureau of Statistics. This compares with 639.5 million last year and the previous high of 729.5 million two years ago. Rye stocks of 7.9 million were 22 percent below last year's 10.1 million. July 31 stocks of oats, estimated at 119.3 million were 23 percent below a year ago while barley stocks at 127.1 million were 8 percent above last year.

EXPORT DONATIONS: A little over 8.6 million cwt. of wheat flour were shipped under Section 416 (foreign donation program) last season. (See page 8 for details by country). This is equivalent to nearly 20 million bushels of wheat as grain. Under the same program 2.8 million cwt. of corn meal were shipped which is equivalent to 8.7 million bushels of corn. During the same period 3.4 million cwt. of wheat flour and 1.65 million cwt. of corn meal were shipped under the domestic donation program. These are equivalent to 7.8 million bushels of wheat and 5.2 million bushels of corn.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

NOTE: Additional shipments included: Oats to Greece, 413,000 bushels in 1958-59 and 693,000 in 1957-58; Grain sorghums to India, 3,833,000, to Israel, 7,907,000, to Korea, 1,670,000 and to Spain 1,238,000 in 1958-59; and to Israel, 5,190,000 bushels, to Korea, 79,000, and to Poland 792,000 bushels in 1957-58; Rye to Poland, 4,738,000 bushels in 1958-59.

Foreign Agricultural Service

In addition to the above, shipments of wheat and corn as grain in bushels were as follows: Wheat to Greece 2,650, India 657,667, Lebanon 18,366, total 678,683 and corn to India 289,107, Indonesia 17,143, Mexico 166,964, Vietnam 244,250 and total 717,464 bushels.

1/ This is equivalent to 19,844,377 bushels of wheat as grain and 8,732,913 bushels of corn as grain.

Based on reports of inspections by licensed grain inspectors at all markets.

Soybean prices compared with market value of soybean oil and soybean meal

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

GRAIN MARKETS MIXED

Winter wheat markets strengthened, corn and grain sorghums weakened and other grains fluctuated within a narrow range during the week ended August 27.

Winter wheat advanced 1-3¢ per bushel at the principal markets. Good export demand, light offerings and heavy loan impoundings were strengthening factors in the market. Spring wheat markets were about unchanged with mill buyers supporting the market quite steadily during the week to cover sales of flour. Durum wheat markets were mostly steady with around 60 percent of the crop harvested. White wheat ruled steady to stronger with limited offerings providing the main support. Prices were unchanged to 1¢ per bushel higher at Portland. The rye market was stronger with a good demand for the lighter receipts and prices gained 3¢ during the week.

Corn prices dropped 2-3¢ per bushel at most markets with favorable prospects for the record crop the principal weakening factor. Arrivals of new crop corn in Texas, with reports of a few fields of corn mature in southern Illinois, indicated the early harvest and prospects for new supplies. Oats and barley markets were mostly unchanged. Receipts of oats were light while marketings of barley were heavy in Minneapolis and Portland. Grain sorghums dropped 12-14¢ per cwt. at Kansas City with arrivals of new crop grain but declined only 1¢ at Fort Worth where the seasonal drop occurred earlier.

Soybean markets were slow with light offerings and a small demand. Prices at Chicago were about 1¢ higher while the market declined 1¢ at Minneapolis. Receipts of flaxseed were light with prices steady at Minneapolis.

RECORD LEVEL GRAIN INSPECTIONS: The number of grain inspections made last season totaled a record 3.5 million as against the previous years' record of 3.0 million and the 10-year average of 2.4 million. Inspected receipts of grain in the fiscal year ending June 30 totaled nearly 4 billion bushels. This is 16 percent above inspected receipts of 3.4 billion bushels during the 1957-58 fiscal year and 22 percent above the 10-year 1948-57 average of 3.2 billion. Of the total inspected receipts last season, 84 percent or 3.3 billion bushels were carlot receipts by rail. This is 16 percent above the previous year and 17 percent above average. Domestic movement of grain by barge of about 600 million bushels has more than doubled in the past 10 years as measured by inspected receipts. Barge receipts of over 400 million bushels of grain were inspected last season. Most of the grain moved down the Mississippi River with 97 million inspected at New Orleans, 48 million at Port Allen, 13 million at Mobile, and 13 million at Memphis. Nearly 35 million bushels moved up the Tennessee River to Chattanooga and Guntersville. Barge shipments at river points of nearly 200 million bushels of grain were inspected last season. Of this, 71 million moved from Minneapolis, 47 million from St. Louis, and 21 million from Peoria. Other points at which over 5 million or more were inspected cargo shipments were Kankakee, Keokuk, Evansville and Henderson. Of the total barge shipment, 104 million bushels were corn, 31 million soybeans, 30 million wheat and 17 million oats. Of the total barge receipts, 163 million bushels were corn, 115 million wheat, 74 million soybeans, 29 million oats, and 20 million bushels of barley. The increased movement of grain by truck is borne out by the inspection records which totaled about 277 million bushels last year. During the past fiscal year, nearly 230 million bushels of grain were inspected truck receipts. The inspected receipts are 38 million or 20 percent above 1957-58 and nearly 5 times the 42 million inspected 10 years ago. Of the trucklot receipts, 77 million bushels were wheat, 60 million corn, 39 million soybeans, and about 20 million each of barley and grain sorghums. Inspected trucklot shipments totaled 47 million bushels last season of which 35 million were corn, 7 million oats, and 2.5 million wheat. Most of the truck shipment inspections were of corn moving from Chattanooga and Guntersville. Minneapolis was the leading market in inspected truck receipts with over 36 million inspected last year. Corn at 17.4 million and soybeans at 10 million were the two most important grains at that market. Over 26.6 million bushels of grain moved to Houston by truck last season with nearly 20 million of it wheat. Other leading markets in truck receipts were Chicago with 16.4 million, Stockton 15.2 million, Richmond 12.9 million, Portland 11.6 million and Duluth-Superior 11.3 million bushels. Since a large portion of the grain moved by truck is not inspected, these figures do not reflect the complete truck movement.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

MARKET REPORT -- URGENT
Grain Market News

QUALITY OF 1959 OATS: The quality of the 1959 oats crop is considerably above average on the basis of inspections during July at 16 important markets. Receipts at these markets graded, in percentage, as follows: No. 1 - 58 percent, No. 2 - 23; No. 3 - 9; No. 4 - 5; and Sample-5 percent. Of the total receipts 57 percent graded "Extra Heavy" (38 lb. or better) and 34 percent "Heavy" (36 lb. or better). About 3.4 percent of the receipts were "Tough". These were graded under the new standards, effective June 1, 1959, which are somewhat tighter than in previous years. Deliverable grades on futures contracts at Chicago, under the new standards, have brought premiums of about 1-1 1/2¢ per bushel over the old standards for the past month.

GRAIN MARKETS STRENGTHEN IN LIGHT TRADING

Cash grain markets were mostly steady to higher for the week ended September 3. Most markets were featured by light offerings and a fair demand.

Winter wheat prices were unchanged to 3¢ higher with demand good for small offerings. Recent price gains failed to meet expectations in drawing grain from country elevators and producers. Flour business continued light for this time of the year and export demand was slow. Spring wheat markets continued slow with prices 1-2¢ per bushel lower. Flour business was mostly of the fill-in type with selling limited. Trading in durum wheat continued slow on light supplies and prices were mostly steady. White wheat markets showed little change with limited grower selling the principal support. A report that additional rye was being shipped from Canada was a weakening factor and prices dropped 1¢ per bushel at the end of the week.

Corn markets strengthened and prices advanced 1-4¢ per bushel. Demand for corn was good but offerings were light which was the principal strengthening factor. Crop prospects continue excellent with reports that 55 percent of Iowa's corn is dented and some of the Indiana and Illinois crops past danger of frost. Oats and barley fluctuated within a rather narrow range with a generally fair demand for moderate offerings. Oats advanced 1¢ per bushel at Chicago but declined 1¢ at Minneapolis where demand was quite narrow. Barley continued weak at Minneapolis despite light receipts but was mostly steady to higher at other markets. Grain sorghum markets were mostly unchanged in light trading.

Marketings of soybeans were extremely light and prices were mostly unchanged in limited trading. Soybeans were quoted unchanged at Chicago and 1¢ lower at Minneapolis. The flaxseed market strengthened early in the week and prices advanced 10¢ per bushel. Smaller crop prospects and light selling were the strengthening factors.

INSPECTIONS OF GRAIN FOR EXPORT: More than 338 million bushels of grain were inspected for export from the United States during May through August. This was 72 million bushels or 27 percent above the 266 million bushels inspected during the same period a year earlier. Most of this increase was in export movement through Great Lakes ports, although Gulf exports also showed a sizeable gain. Atlantic and Pacific ports, however, moved less grain than a year ago.

Of the total exports, about 26 percent moved through Great Lakes ports and 51 percent went through Gulf ports. A year earlier, Great Lakes ports accounted for only about 4 percent of the total but Gulf shipments comprised about the same percentage of total exports as they did this year. Grain exports through Atlantic and Pacific ports made up about 10 and 12 percent, respectively, of this year's May-August total, compared with 21 and 24 percent, respectively, the comparable period last year.

Exports through Great Lakes ports, during May through August totaled 89.2 million bushels. This was nearly eight times greater than the 11.3 million bushels exported a year earlier. Heavier movement of corn, oats and barley accounted for most of the increase.

Inspections for export through Gulf ports covered a total of 173.6 million bushels of grain during May through August -- about 28 percent more than the 135.4 million bushels exported a year earlier. Most of the increase was in movement of wheat, barley and corn.

Although exports of 42.1 million bushels of grain through Atlantic ports were down about 40 percent from a year earlier, movement through Pacific ports was down too, as inspections covering 42.1 million bushels were about 35 percent below a year ago. A sharp drop in oats and barley movement accounted for most of the decrease in both Atlantic and Pacific exports.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

GRAIN MARKETS MIXED

Cash grain markets showed a mixed trend during the holiday-shortened week ended September 10. Soybean and grain sorghum prices dropped sharply and corn weakened slightly, but flaxseed chalked up a substantial gain. Other grains registered little or no change.

Wheat markets fluctuated within a narrow range during the period but closed generally unchanged. Continued light country selling and fair domestic and export demand were the main stabilizing influences. Rye, influenced to some extent by increased stocks at Chicago, weakened at Minneapolis and closed 2¢ lower.

Corn finished 1-5¢ lower at principal markets in a further adjustment to a new-crop basis. Relatively light offerings continued to find strong demand and supplies were quickly absorbed. The record 4.4-billion-bushel corn crop was maturing rapidly over most of the Corn Belt and harvesting was progressing rapidly in the southern area. Oats and barley markets held about steady in generally quiet trading, with supplies and demand in fairly even balance. Grain sorghum prices dropped 12-14¢ per cwt. at Kansas City and went down 3¢ at Fort Worth as current demand failed to absorb the influx of new-crop offerings.

Soybeans lost 5-8¢ per bushel as buyers lowered their bids in an adjustment to a new-crop basis. Harvest of the 553-million-bushel crop was expanding over wide areas and new-crop beans were moving to elevators and processors in southern and central parts of the Soybean Belt. Purchases in down-state Illinois for near-by delivery were reported at 9-10¢ per bushel under the September future price. Flaxseed, influenced by prospects for a small crop and strength in futures markets, advanced 10¢ at Minneapolis.

CANADIAN GRAIN SUPPLIES: Canadian supplies of wheat for 1959-60 are currently estimated at 951 million bushels -- about 6 percent less than 1.0 billion for 1958-59. The Dominion Bureau of Statistics predicted on the basis of mid-August conditions a crop of 405 million bushels this year. This includes 15.1 million bushels of Durum wheat, slightly less than last year. If realized, this year's Canadian wheat crop will be about 33.3 million bushels or 9 percent larger than the previous year but around 85 million bushels or about 17 percent below the 10-year (1949-58) average. August 1 carryover stocks dropped to 546.3 million bushels -- 15 percent below the 639.5-million-bushel carryover a year earlier. Although exports of nearly 294 million bushels of Canadian wheat and flour were 26.4 million below the year before, total disappearance of wheat increased slightly as domestic use went up 30.7 million bushels. It totaled nearly 171 million bushels -- the highest domestic usage in 15 years. Supplies of oats, barley, rye, and flaxseed for the 1959-60 season are slightly smaller than those at the beginning of the 1958-59 season.

U. S. CROP PRODUCTION: If harvest of fall-maturing crops is successful, this year's total crop production will be just under last year's astounding record. The Crop reporting Board's September 1 forecast calls for a record corn crop of nearly 4.4 billion bushels -- 5 percent more than the August 1 estimate, 15 percent above the previous record last year, and 35 percent more than the 1948-57 average.

Although soybean production - estimated at 533 million bushels - is 7 percent below last year's record, it is still the second largest of record and is nearly two-thirds above the 10-year average. Forecast of a 565.6-million-bushel grain sorghum crop is 8 percent below the 1958 record but is more than 2 1/2 times above average. Production of spring wheat declined slightly during August and on September 1 was estimated at 20.5 million bushels for Durum and 186.6 million bushels for other spring wheat. Although forecasts of oats and barley crops improved during August, they were 24 and 13 percent, respectively, smaller than last year.

| FLAXSEED | Minneapolis | No. 1 | 266 | 256 | 345 | 335 | 300 |

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

COMMODITY CREDIT CORPORATION INVENTORY AND SALES

(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

1/ Total carryover of Canadian grain in Canada and U. S.

2/ Total domestic use including seed, feed, food, and other items.

3/ Wheat exports include flour; other exports are grain only. (1958-59 exports preliminary).

4/ August estimate of production.

Based on official Canadian reports.

CORN LOWER - OTHER GRAINS WEAKER

Corn prices dropped sharply during the week ended September 18. Other grains closed unchanged or a little weaker. Weather was a big factor. It favored soybean harvesting and rushed maturity of the record corn crop in areas where picking was not already underway.

Wheat held generally steady in light trading at most markets. However, winter wheat finished about 2¢ per bushel lower at Kansas City, while soft white wheat - influenced by active export trade - advanced 1-3¢ at Portland. Country selling remained light as farmers were busy either harvesting late feed grains or planting new winter wheat, but supplies were adequate for domestic and export demand as offerings from interior points increased with many elevators making space for incoming feed grains. Rye weakened at Minneapolis, but the decline in the cash market was not as pronounced as that in the futures.

Corn closed 2-13¢ per bushel lower at principal markets as pressure from the new crop continued to build up. Demand was at low ebb and current offerings found very narrow outlets. Oats and barley were generally unchanged as light offerings and demand continued to limit trading. Grain sorghum prices went down 5-6¢ per cwt. at Kansas City and a penny at Fort Worth. Domestic and export demand was good, but it failed to absorb the influx of new-crop offerings.

Soybeans closed about unchanged at Chicago but lost 5¢ per bushel at Minneapolis. Trading was light, with both producers and processors awaiting the peak harvest period and further developments in the market. Flaxseed, influenced by a drop in futures prices, declined 3¢ at Minneapolis.

SOYBEAN PRICING POLICY: The October-December 1959 selling price for soybeans in the Commodity Credit Corporation inventory for domestic crushing or export has been set at the market price but not less than 20¢ per bushel above 1959 county price-support rates. This will apply to both 1958- and 1957-crop soybeans in CCC inventory. It was also announced that both 1958- and 1957-crop soybeans will be eligible for exchange under the barter program beginning October 1.

CHANGES IN CCC BARTER PROGRAM: A number of changes in the barter program through which CCC exchanges surplus agricultural commodities for strategic materials and other materials produced abroad were announced recently. Changes are incorporated in a new table of commodity-country designations which reclassifies barter outlets for surplus agricultural commodities. The new table became effective immediately and governs all barter offers.

Wheat, Hard Red Spring: Distribution by protein brackets of spring wheat tested at Minneapolis, August 1958 and 1959 and crop years 1955-59

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

1/ Carlot receipts have been converted to bushels on the basis that 1 carlot equals 1,750 bushels.

2/ Of the August receipts, all were Yellow soybeans. Inspections of soybeans in August included 3,308,413 bushels as cargo lots, 649,842 bushels as truck receipts, and the balance as carlot receipts.

Based on reports of inspections by licensed grain inspectors at all markets.

CORN DOWN - OTHER GRAINS LITTLE CHANGED

Corn prices dropped in a further adjustment to a new-crop basis during the week ended September 24. Flaxseed was down too, but other cash grains showed little or no change.

Winter wheat, bolstered by light offerings and fairly good demand, held firm at most markets. Country selling continued to shrink as farmers remained busy planting new wheat or harvesting fall grains. Although some elevators moved wheat more freely to make room for grain sorghums and soybeans, storage was adequate in most areas and few elevators were pressed for space. Spring wheat finished about unchanged in quiet trading but Durum wheat ended up about 2¢ per bushel lower at Minneapolis. Soft white wheat advanced 2-3¢ behind good export demand at Portland. Rye weakened at Minneapolis.

Corn prices dropped 3-12¢ per bushel at principal markets as the record new crop continued to exert pressure on cash sales. Some strength was noted in Kansas and Nebraska, however, as rains delayed harvesting and marketing. Harvesting made rapid progress in early areas and only a limited acreage in the Corn Belt has not reached the denting stage. Oats and barley showed little or no change in quiet trading. Grain sorghums weakened as fair to good demand failed to absorb new-crop offerings. Harvesting made good progress in Texas but wet weather interrupted combining in Kansas. Reports indicate yields are good and storage space is ample in Texas where a considerable amount of new-crop milo was moving to California.

Soybeans weakened slightly in relatively quiet trading this week. Marketings were light partly as a result of price dissatisfaction and of the extended harvesting period due to variations in ripening not only between varieties but also between dry and moist producing areas. Flaxseed found few buyers and prices closed 7¢ per bushel lower at Minneapolis.

| Feed grains - payment-in-kind export bids..... | 2 |
| Wheat - amount under price support by States..... | 7 |
| Soybeans and flaxseed - supply and distribution, monthly..... | 8 |

PRICE SUPPORT OPERATIONS: Farmers put 174.2 million bushels of 1959-crop wheat under price support through August 31, 1959 compared with 237.5 million bushels through August 25, 1958. Nearly half of the wheat under loan was in Kansas, but substantial amounts also were under support in Nebraska, Oklahoma, Texas and Washington. Noteworthy amounts of other grains under price support through August 31, with comparable data for a year earlier in parentheses, in million bushels were: Oats 2.2 (12.3), barley 7.4 (13.8) and grain sorghums 5.7 (13.6). In addition, farmers also had placed 343.9 million bushels of 1958-crop corn under loan and 37.5 million bushels under purchase agreements through August 31, 1959. Of the quantity put under support, farmers repaid loans on 97.6 million bushels and delivered 31.8 million bushels under loan and 3.5 million bushels under purchase agreements.

Grains: Price support activities as of August 31, 1959
(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

GRAIN MARKETS STRENGTHEN

Cash grain markets turned stronger during the week ended October 1, with corn leading the upswing. Strength stemmed mainly from a fairly good demand for small spot offerings.

Winter wheat firmed up under the influence of good domestic demand and continued light country marketings. Spring and durum wheat, bolstered by ready outlets for light receipts, went up 3-4¢ per bushel at Minneapolis. Portland's white wheat market softened as export trade slackened and offerings picked up following recent price gains. Rye strengthened at Minneapolis. Good milling rye found ready outlets, but strength was due mostly to lighter receipts.

Corn advanced 2-10¢ per bushel at principal markets as rains delayed harvesting and current offerings failed to satisfy a strong to urgent demand. Oats borrowed some strength from corn and finished in a firm position, but barley showed some softness as both domestic and export demand slackened. Grain sorghums were about unchanged as weakness at Fort Worth was generally offset by strength at Kansas City. Receipts were smaller as wet weather delayed harvesting. Demand was light in Texas but brisk in Kansas.

Soybeans went up 5¢ per bushel at Minneapolis and 2¢ at Chicago as rains delayed the harvest and offerings failed to satisfy strong processor demand. Country selling remained slow, with substantial quantities of new-crop soybeans reported going into farm storage. Increasing export interest in soybeans and advances in the soybean meal market also were strengthening factors in the spot market. Flaxseed, influenced largely by active export trade, went up 7¢ at Minneapolis.

WORLD WHEAT PRODUCTION: The 1959 world wheat crop is the second largest of record and was forecast at 7.9 billion bushels by the Foreign Agricultural Service. This is 800 million less than the record 1958 crop but 900 million above the 5-year 1950-54 average. The bulk of the decline from last year is in the United States and the Soviet Union. Both of these countries had record crops in 1958 and together account for 40 percent of the world production. Western Europe's wheat crop, estimated at 1,385 million bushels is 45 million above last year's total. Production in Eastern Europe is expected to be 19 percent more than last year. The larger wheat crop in Europe this year may mean reduced import needs in Western Europe with United States meeting increased competition from Eastern Europe. France's near-record crop provides a substantial surplus for export. A record crop was reported for Spain but Italy is expected to have a comparatively poor crop this year. The largest increase in Eastern Europe is in Yugoslavia where this year's estimate is 65 percent above 1958.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

COMMODITY CREDIT CORPORATION INVENTORY AND SALES
(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

GRAIN MARKETS STRENGTHEN

Cash grain markets strengthened further during the week ended October 8, with corn, soybeans and flaxseed leading the upturn. Good demand and light offerings were supporting factors.

Firmness in wheat was attributed to continued light country selling, fairly good domestic demand for limited offerings, and pending termination on a temporary basis of the dock strike at Atlantic and Gulf Coast ports. Rye held firm at Minneapolis, with active demand for good milling quality.

Corn generally closed 1-8¢ per bushel higher around the market circle. Offerings again failed to satisfy current demand as wet weather further delayed harvesting. Country reports indicate farmers are buying snow fences and similar temporary crib material for storing the record crop. USDA announced Thursday that the national average support price for 1959-crop corn will be \$1.12 per bushel -- unchanged from the minimum announced earlier this year. Oats and barley, reflecting strength in corn, fairly good demand and relatively light offerings, finished in a firm position at most markets. Malting barley, however, weakened under selling pressure at Minneapolis. Grain sorghum prices firmed up as wet weather interrupted harvesting and current offerings failed to satisfy demand.

Soybeans advanced 5-6¢ per bushel as rains delayed harvesting and checked movement of new-crop beans to market. This gave some urgency to spot demand and also improved outlets for CCC take-over soybeans under the new sales formula. Soybeans also drew some strength from trade anticipation of a smaller crop and possible deterioration due to moisture both of which would reduce this season's supplies to or below trade requirements. Flaxseed went up 5¢ on very light offerings at Minneapolis.

1/Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

Washington 25, D. C.

GRAIN MARKETS MIXED

Cash grain prices showed a mixed trend during the week ended October 15. Corn dropped, but flaxseed posted a sharp gain. Other grains fluctuated within narrow bounds and closed with little or no change from a week ago.

Winter wheat held firm in quiet trading. Farm selling remained light and export interest improved, but strength stemmed mainly from active mill demand for light offerings. Spring wheat weakened in the face of light receipts as very little flour business developed at Minneapolis. Durum wheat was unchanged. White wheat was unchanged at Portland with light country offerings and slow export trade. Rye held firm at Minneapolis, bolstered by strong demand for milling type and news of snow and generally unfavorable weather in Canada where some rye is still in the field.

Corn prices dropped 3-14¢ per bushel in an adjustment to a new-crop basis as clearing weather and improved harvesting conditions for the record crop exerted pressure on the cash market. Demand, however, remained very good for current offerings. Trade reports indicate that most dealers expect fairly heavy selling at the peak of harvest because of the high moisture content of new-crop corn. Firmness in oats and barley was attributed mainly to light offerings. Grain sorghum markets were mixed -- unchanged to 2¢ per cwt. lower at Kansas City but 5¢ higher at Ft. Worth. The number of samples grading "discolored" increased at Kansas City as a result of the prolonged wet weather. Offerings were light at Ft. Worth and export demand was very brisk. Much of the milo has a high moisture content, however.

Soybean prices declined 3¢ per bushel as harvesting weather improved. Receipts remained light, however, and some showed ground damage and weather discoloration. Flaxseed advanced 18¢ at Minneapolis. Strength stemmed mainly from a smaller U. S. crop and reports that bad weather has interfered with flaxseed harvest in the Canadian Prairie Provinces.

| Report of yield and production..... | 8 |

CROP PRODUCTION: Crop prospects for the 1959 corn crop improved during September with conditions at the first of October indicating a harvest of 4,429 million bushels. This is 1 percent above the September estimate and 17 percent above the 1958 record crop. With excellent weather conditions during the growing season in most areas, the yield is forecast at a record 52.5 bushels per harvested acre compared with 51.7 last year and the average of 40.6 bushels. Spring wheat prospect improved slightly during September but no estimate was made for the production of winter wheat, rye, oats and barley. A crop of 573 million bushels of sorghum grain was indicated October 1 -- an increase of 1 percent above a month earlier but 7 percent below the 1958 crop. Soybean production, estimated at 530 million, was down slightly from September and 8 percent below the record 574 million produced last year. The estimate of the flaxseed crop dropped 8 percent during September with production of 22 million the smallest in 15 years.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

COMMODITY CREDIT CORPORATION INVENTORY AND SALES

(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

GRAIN MARKETS MIXED

Cash grain markets continued to show a mixed trend during the week ended October 22. Winter wheat, rye and flaxseed advanced during the week while corn continued to decline with increased marketings.

Winter wheat advanced 2-5¢ per bushel to the highest level of the season. Light offerings and a fair domestic and export demand were mainly responsible for the higher prices. Spring wheat was unchanged to 1¢ lower as flour sales continued slow. Nearness of the end of water navigation in the Upper Lake area was also a weakening factor. Durum wheat was unchanged. White wheat advanced 1-3¢ per bushel at Portland as demand from domestic mills increased and exporters became more active. Rye advanced 3¢ per bushel at Minneapolis with a good demand for light offerings. News of bad weather in Canada accounted for part of the firmness.

Corn prices dropped 1-4¢ per bushel as excellent drying and harvesting weather brought increased supplies of the new crop. Demand was generally good for the relatively light supplies but expected heavy receipts was the main weakening factor. Oats showed a mixed trend with gains of 3¢ at Chicago and a loss of 2¢ per bushel at Minneapolis. Demand was light at the latter market but export interest was more aggressive at Chicago. Feeding barley was about unchanged but the better malting types advanced 4-6¢ with increased demand. Grain sorghums were mixed with a good export demand boosting values 2¢ per cwt. at Fort Worth but increased offerings dropped prices 2-4¢ per cwt. at Kansas City.

Soybean markets were mostly unchanged with increased offerings readily absorbed. The quality of the soybean arrivals this week improved with a drop in the moisture content. Flaxseed advanced another 5¢ with an aggressive demand for light supplies.

| Soybean prices compared with soybean oil and meal prices..... | 11 |
| Soybeans - quantity processed by months..... | 12 |

PRICE SUPPORT OPERATIONS: Farmers have put less grain under price support thus far this season than a year earlier, due in part to smaller crops and to many prices generally at or above support levels. Through September 30 farmers put 235 million bushels of wheat under support this year as against 382 million a year earlier. By the same date farmers had put 17 million bushels of barley under support or a little less than half the amount at the same time in 1958. Less than 5 million bushels of oats had been put under support by the end of September this year compared with over 28 million by September 30, 1958. Farmers put 6.6 million cwt. of grain sorghums under price support this year as against 18.2 million last year.

SOYBEANS CRUSHED: September soybean crushings totaled 27.5 million bushels compared with 29.6 million in August and 25.1 million in September 1958. These brought the total for the 1958-59 season to 401.2 million as against 353.8 million in 1957-58 and 315.9 million in 1956-57. On the basis of the Census reports of the total crushings, the average outturn of a bushel of soybeans was 10.6 pounds of oil last year as against 10.7 for the 1957-58 season.

SOYBEAN PRICES RELATED TO SOYBEAN PRODUCTS: Soybean prices averaged \$2.11 per bushel at Illinois country points last season or about 4 percent below 1957-58 and 18 percent below the 5-year average. Soybean oil at crushing plants averaged 9.5¢ per pound which was 12 percent below 1957-58 and 22 percent below average. Soybean meal with 44 percent protein, Decatur basis, averaged \$55.80 per ton. This was 3 percent above the 1957-58 average and 5 percent below average. On the basis of these figures the margin between the cost of a bushel of soybeans and the price of the outturn of oil and meal averaged 24¢ per bushel last season as against 26¢ in 1957-58 and 15¢ the 5-year average.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

1/ Estimates of the Crop Reporting Board.

2/ Commercial stocks reported by Grain Division, AMS, at 44 Terminal cities.

3/ Owned by C. C. C. and stored in bins, ships or other storages owned or controlled by C. C. C.; other C. C. C.-owned grain is included in the estimates by positions.

4/ All off-farm storages not otherwise designated, including merchant mills.

5/ October estimates reported by Crop Reporting Board. July estimates reported by Census Bureau.

Grains: CCC-owned stocks, September 30, 1959
(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

SUMMARY
AND
STATISTICS

GRAIN DIVISION

AGRICULTURAL MARKETING SERVICE

UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 2 No. 4

Washington 25, D. C.

October 29, 1959

Grain prices during the July-September quarter showed a mixed trend compared with a year earlier. During this period, wheat and rye averaged 7¢ per bushel above a year ago, oats 5¢ higher and flaxseed 15¢ above. Feed grains and soybeans generally averaged lower with corn down 4¢, barley 2¢, soybeans 9¢ per bushel and grain sorghums 10¢ per cwt. lower. Most of the grains continued the same price pattern for the first three weeks of October. However, flaxseed advanced and increased the spread over last year as crop prospects deteriorated.

Wheat prices near the end of October averaged well above last year, reflecting in part the smaller crop but also the increased demand for lighter offerings. Prices were generally above the effective support level which ranged 1-3¢ per bushel below last year. Premiums for high protein wheat were sharply lower this year due to the higher protein content of the new crop. At Minneapolis, 53 percent of the wheat tested 14 percent protein or higher during August and September as against 23 percent last year. At Kansas City, 36 percent of the July-September receipts tested over 13 percent or higher compared with 20 percent last year. Premiums for 15 percent protein averaged 10¢ this year at Minneapolis as against 18¢ last year while at Kansas City premiums for 13 percent protein averaged 11¢ this year and 17¢ last year. Stocks of wheat in all positions October 1 were the second largest of record and totaled 2.1 billion bushels. These stocks are nearly double the 1959 crop, reflecting the continued large carryover of old wheat. Of the total stocks, the Commodity Credit Corporation owned 1.1 billion bushels. Wheat and flour exports totaled 105 million bushels the first 3 months of the season, an increase of around 8 million over last year. Flour milling was down about 2 percent and totaled 143 million bushels. Supplies of wheat in Canada for 1959-60, estimated at 967 million bushels, are 44 million below last season. A world wheat crop of 7.9 billion bushels was forecast for 1959, or 9 percent under last year.

Rye averaged 7¢ per bushel above a year ago with crop prospects 35 percent below last year. Increased carryover stocks in part offset the smaller crop but estimated supplies of 36.6 million bushels for 1959-60 are about 20 percent below 1958-59. October 1 stocks of 27.8 million are 4.8 million below a year ago. Disappearance of rye -- 8.8 million bushels the first quarter -- was 4.1 million below last year. Only 1.5 million bushels were exported as against 5.2 million last season. Feed disappearance was down but other uses were about unchanged.

Corn prices at the farm July through September averaged 4¢ per bushel below a year ago, with the October average at Chicago 5¢ below last year. Pressure from the record crop and record carryover was the underlying weakening factor. Although offerings through October continued relatively light. A crop of 4.4 billion bushels was indicated October 1, which if realized would be 17 percent above the previous record. Included in the crop is 329 million of corn equivalent

for silage, forage, hogging and grazing. Carryover stocks of old corn at 1.5 billion bushels were 58 million above last year. Of the carryover, CCC owned 1.2 billion bushels outright and about 231 million were under resale or in the process of being delivered. Disappearance of corn (grain only) last season of nearly 3.4 billion bushels was 12 percent above the previous record for 1957-58. Exports of 213 million bushels of corn were up sharply while quantities for wet milling and alcohol were also sharply above the previous season. Feed use of grain per animal unit was 16.7 bushels in 1958-59 compared with 15.9 in 1957-58 and 14.5 the 5-year 1953-57 average. Exports of corn meal, mainly donations, totaled around 10 million bushels in grain equivalent.

Oats averaged 5¢ per bushel above last year during the first quarter of the season. This mainly reflects the smaller crop which is currently estimated at 1.1 billion bushels, a drop of 24 percent from last year. Oats stocks on October 1 of 1.0 billion bushels were the smallest since 1944. Despite the smaller supplies, disappearance the first quarter of 434 million were 20 million above last year and 8 million above average. Exports of 16.3 million were almost three times those of a year earlier.

Barley prices, July-September this season, averaged 2¢ per bushel below the same months last season reflecting in part the larger total feed grain supplies and the lower support rate. Barley supplies for 1959-60 are down about 6 percent but disappearance the first quarter was up by 8 percent. Nearly 90 million bushels of barley were fed the first quarter, the largest since World War II. A record 41 million bushels of barley were exported the first quarter while industrial uses, were somewhat below average. Supplies of barley in Canada for 1959-60 are currently estimated at 356 million bushels or slightly smaller than for 1958-59.

Grain sorghum prices at the end of October ranged from 12-19¢ per cwt. below a year ago reflecting the larger supplies and the lower support rate. Supplies of grain sorghums for 1959-60, currently estimated at 602 million cwt., are 16 percent above last season's record. A crop of 321 million cwt., indicated October 1, is 7 percent below last year. Carryover stocks of 281 million cwt. are 62 percent above a year earlier. Of the total stocks, CCC owned 270 million outright with an additional 7 million cwt. under resale. Disappearance last season of 237 million cwt. was a record with feeding 17 percent above the previous season. Exports totaled almost 57 million cwt. as against 32 million in 1957-58.

Soybean prices, July-September this year, averaged 9¢ per bushel below the same months last year but in October prices were slightly higher. This in part reflected the slowness of harvest during September due to extended rains and wet weather which delayed the marketing of new crop soybeans. The 1959 crop, estimated at 530 million bushels on October 1, is 8 percent below last year's record. The drop in production was about offset by the record carryover of 62 million bushels, which is about 3 times those of last year. Total supplies of 592 million for 1959-60 are only 3 million below last season but about 100 million above 1957-58. A record 108 million bushels of soybeans were exported last season as against 86 million in 1957-58. Soybean oil exports totaled around 935 million pounds compared with 804 million the year before. Crushings of 401 million bushels of soybeans last season ran 47 million above the 1957-58 season.

Flaxseed prices near the end of October stood 75¢ per bushel above a year ago reflecting the smallest crop in 15 years. Stocks of flaxseed October 1 totaled 22.5 million bushels, 14.5 million below a year ago. This year's crop of 21.8 million is 45 percent less than the 1958 production. Disappearance the first quarter was above last year as crushings of 8 million increased 2.4 million and exports of 4.2 million were 1 million higher.

| 1/ Owned and stored in bins on at | | | | | | | |

1/ Owned and stored in bins or other storage owned or controlled by CCC. Additional CCC-owned grain is included in other positions.

2/ All off-farm storages not otherwise designated, including merchant mills.

3/ Does not include Canadian wheat milled in bond, but includes about 10,000,000 bushels of wheat used annually for breakfast food.

4/ Mostly quantity fed, but includes industrial use, waste, loss, and statistical errors in estimates.

1/ Owned and stored in bins or other storage owned or controlled by CCC. Additional CCC-owned grain is included in other positions.

2/ All off-farm storages not otherwise designated, including merchant mills.

3/ Principally alcohol and distilled spirits. Includes allowance for wet-process milling.

4/ Mostly quantity fed, but includes other uses, waste, loss, and statistical errors in estimates.

1/ Quantity of current crop placed under support minus the quantity of loans repaid.

2/ Quantity of previous crops under reseal, extended reseal, or re-extended reseal. Includes loans outstanding from the previous crop-year program not yet delivered or resealed.

3/ Does not include new-crop corn, grain sorghums or soybeans put under support, since the total stocks of these grains include old-crop grain.

4/ Total grain in all positions as reported by Agricultural Estimates Division, AMS.

* Partly estimated since reports of takeover and reseal are not complete.

GRAIN MARKETS FIRM OR HIGHER

Cash grain markets ruled firm to higher during the week ended October 29. However, some softness appeared in rye, corn and barley.

Winter wheat closed firm, with prices near or at the high point of the season. Prices were generally above effective support rates and country selling increased. Although slightly larger than the previous week, offerings at terminal markets still fell short of trade requirements. Some traders expressed concern over the close balance between "free" supplies and trade needs as a result of the amount of wheat that has been put under loan so far this season. Spring wheat went up 4¢ per bushel but durum held steady at Minneapolis. White wheat held firm in active trading at Portland with good domestic and export demand for increased marketings by farmers. Rye weakened in narrow trading at Minneapolis.

Cash corn held firm at most markets but closed a little weaker at Kansas City, Omaha and Minneapolis. Harvesting made fairly good progress under improved weather conditions. Offerings, however, remained light as producers made extensive use of temporary cribs and apparently confined sales to corn for which they had no storage space. Demand continued good. Oats held firm, bolstered by the small crop and trade anticipation of sizable exports. Barley also ruled firm behind good demand for relatively light offerings at most markets. However, prices weakened at Portland where offerings were moderate and export demand slackened. Grain sorghum prices edged forward 2-4¢ per cwt. as increased receipts met steady domestic and very good export demand.

Soybean markets firmed up in the face of expanded offerings. Receipts increased as soybean harvest pushed toward completion, indicating an early end to harvest pressure on marketings. Receipts were not burdensome at any time, however, and buying was fairly competitive. A major strengthening influence in soybeans was the drouth in Europe. It is creating additional outlets for U. S. soybeans and oilseed meals for feed to satisfy increased European demand for meats and poultry. Flaxseed, sparked by strong foreign demand, the short U. S. crop and the fact that a good part of Canada's crop was covered by snow prior to harvest, advanced 15¢ at Minneapolis.

Special Features

| | |
|--|---|
| Feed grains - payment-in-kind export bids..... | 2 |
| Grains - average cash prices for specified months..... | 7 |
| Grains - U. S. exports, September..... | 8 |

CONSERVATION RESERVE APPLICATIONS EXCEED GOAL: USDA announced it has received nearly 103,000 applications to place a total of 9.6 million acres in the 1960 Soil Bank Conservation Reserve -- almost twice the national acreage goal. Deadline for filing applications was October 16 in all States. It will not be possible to accept all of the acreage offered for 1960 contracts, but indications are that USDA can accept a somewhat larger acreage than its original 5.1-million-acre goal.

GRAIN EXPORTS: Grain exports dropped slightly during October reflecting the dock strike the first part of the month. Wheat exports totaled 21 million during October on the basis of inspections compared with official exports of 27.7 million in September and 29.7 million in October 1958. Exports of wheat and flour for the first four months of this season totaled 135 million as against 134 million last season. Corn exports in October are estimated at 10 million bushels compared with 15.7 million exported in September and 15.6 million in October 1958. Soybean and grain sorghums exports in October were both below last year. For the 1958-59 season total exports of 212 million bushels of corn, 100 million of grain sorghums and 110 million bushels of soybeans ran much heavier than exports the previous season. Exports of oats and barley continued heavy in October despite the strike and totaled 4.5 million and 10 million, respectively. Exports the first four months of 20.5 million bushels of oats and nearly 50 million bushels of barley are both well above last season.

Feed grain payment-in-kind export bids, October 23-29, 1959

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

COMMODITY CREDIT CORPORATION INVENTORY AND SALES

(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

GRAIN MARKETS MIXED

Cash grain markets showed a mixed trend during the week ended November 5. Winter wheat, barley and grain sorghum prices softened, but soybeans advanced sharply. Other grains were firm or a little stronger.

Winter wheat lost 3-7¢ per bushel at Fort Worth and 2-3¢ at Kansas City. With prices generally above support level, farm selling was more active, particularly in the Southwest. Demand, however, was only fair for increased offerings. Spring wheat went up 3¢ at Minneapolis as buyers attempted to fill out loads for shipment from the Duluth-Superior area prior to the close of the Great Lakes navigation season. Mills were also in the market covering recent flour sales. White wheat softened in Portland as buying interest subsided with slow export trade. Rye was unchanged in quiet trading at Minneapolis.

Corn gained 2-4¢ per bushel at principal markets, influenced mainly by small marketings, unfavorable weather in the Corn Belt and indications of expanding export and domestic demand. With the record crop in the background, buyers generally limited purchases of current high-moisture corn to immediate needs. Oats ruled firm in slow trading, with light supplies and export demand for feed grains from drouth-stricken Europe providing support. Barley, on the other hand, weakened in slow trading, but prices steadied near the close under improved export demand. Grain sorghum prices softened as fairly good demand failed to absorb increased offerings.

Soybeans advanced 8-10¢ per bushel. Producers continued their holding tendency and processors had difficulty finding enough soybeans to satisfy their requirements. Strong demand for soybean meal from Europe as a result of the drouth also was a major strengthening factor. With current marketings by farmers failing to satisfy demand and with cash soybean prices above Commodity Credit Corporation's formula sales price, CCC sold between 1 and 2 million bushels of take-over soybeans daily for the past three or four days. Flaxseed finished about 2¢ higher at Minneapolis after a sharp rise early in the week was partly wiped out by late-week losses.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

GRAIN MARKETS LITTLE CHANGED

Cash grain markets showed little or no change in relatively light trading during the week ended November 12.

Winter wheat closed in a firm position, with support stemming mainly from a letup in country selling. Light offerings met fair domestic demand and continued active export interest. Spring wheat declined 2-4¢ per bushel behind rather indifferent demand but Durum wheat held steady at Minneapolis. White wheat softened as export trade slacked off at Portland. Rye, influenced by weakness in the wheat market and rye futures, declined slightly at Minneapolis.

Cash markets for corn were little different from the previous week. Pressure from the record crop was relieved to some extent by good demand for currently light offerings. Oats, bolstered by the small supply, held firm but barley weakened in slow trading. Grain sorghum prices were unchanged with offerings generally adequate for good domestic and export demand.

Soybean markets softened as the latest crop forecast of 528 million bushels was not down as much as the trade had anticipated. Further losses were checked to some extent by currently light offerings and good demand from processors as well as export interests. Flaxseed weakened as buyers became less aggressive in Minneapolis.

Special Features

| Wheat, Hard Red Spring and Hard Red Winter - distribution by protein brackets..... | 7 |
| Wheat - supply and distribution, monthly..... | 7 |
| Corn, grain sorghums and soybeans - harvested acreage, yield and production..... | 8 |

CROP PRODUCTION: November 1 crop estimates call for a record corn crop and the second largest grain sorghum and soybean crops of record. Wet weather interrupted harvesting off and on during October. Corn production was estimated on November 1 at 4.4 billion bushels, down about 1/2 percent from the October 1 forecast but 16 percent above the previous record last year and 35 percent above average. The soybean crop of 528 million bushels was down slightly from last month and 8 percent below the record 574 million bushels for 1958. Forecast of a 589-million-bushel grain sorghum crop was second only to the 615-million-bushel record 1958 crop and about 2 3/4 times as large as the 10-year (1948-57) average.

CANADIAN INSPECTIONS: During October the Agricultural Marketing Service in Montreal inspected for overseas export 368,122 bushels of wheat, 59,200 bushels of corn and 290,598 bushels of barley that had been shipped to Canada previously.

WHEAT PROTEIN HIGHER: Protein content of 1959-crop wheat receipts at Minneapolis and Kansas City has been much higher than a year earlier. Almost three-fourths (73.4 percent) of the Hard Red Spring wheat received at Minneapolis in October tested 14 percent and better protein compared with less than half (48.6 percent) a year ago. About 32 percent of the Hard Red Winter wheat receipts at Kansas City was 14 percent and better protein as against 13 percent in October 1958. So far this season, around 56 percent of the Spring wheat at Minneapolis and 24 percent of the Winter wheat at Kansas City had a protein content of 14 percent and above. A year earlier, only 26 percent of the Spring wheat and 8 percent of the Winter wheat tested 14 percent and better protein. (See table on page 7.)

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

November 20, 1959

GRAIN MARKETS SLOW WITH NARROW PRICE CHANGES

Cash grain markets were slow during the week ended November 19 with a generally limited demand for light offerings. Prices generally fluctuated within narrow ranges and closed at about last week's level.

Winter wheat markets were mixed with a relatively firm market at Kansas City due mainly to light offerings. Prices at Chicago and Ft. Worth declined 1-2¢ with receipts more than ample for trade needs. Spring wheat markets weakened with prices unchanged for ordinary protein but 1-2¢ lower for the high protein varieties. Weakness stemmed partly from larger receipts early in the week, slow flour sales and nearness of the end of lake shipping from Duluth. Durum wheat was steady with demand good. White wheat gained 1¢ during the week reflecting limited country selling although domestic and export sales were light. Rye declined 4¢ at Minneapolis.

Cash markets for corn were little different from the previous week. There was a generally good demand for the increased receipts but prices were mostly at last week's level. Despite the good demand, oats prices generally dropped 1¢ per bushel. Barley also declined 1-4¢ with the greatest loss in the malting grades. Export interest was slow. Grain sorghums were about steady at Kansas City but declined 3¢ per cwt. at Ft. Worth as export demand was slow and domestic outlets failed to absorb the ample offerings.

Soybean markets continued weak despite a relatively improved demand for larger offerings. Prices were mostly 1-2¢ per bushel lower. Country offerings were seasonally light. Commodity Credit Corporation sold 23 million bushels of soybeans between October 1 and November 13. Flaxseed lost 15¢ during the week at Minneapolis. The loss reflected reaction to the sharp advance of the past two months.

Special Features

| | <u>Page</u> |
|---|-------------|
| Feed grains - payment-in-kind export bids | 2 |
| Soybeans - inspected receipts by grades | 7 |
| Soybean prices compared with soybean oil and meal prices | 7 |
| Wheat, rye, corn, oats, barley, grain sorghums, soybeans and flaxseed - amount under price support by states | 8-11 |
| Grains - amount under price support | 12 |

SOYBEAN QUALITY: The average quality of the 1959 soybean crop is as good or a little better than last year or the 1957 crop on the basis of inspected receipts during October. Of the total receipts 73 percent graded No. 2 or better this October compared with 70 percent a year earlier, 72 percent in October 1957 and 66 percent the 5-year 1952-56 average. The percentage testing No. 2 or better was especially high in the large producing areas of the midwest. This was in part offset by relatively large percentages grading No. 3 in the southeastern area. The total inspected during October was 95 million this year as against 129 million last year and 94 million in October 1957.

PRICE SUPPORT: Farmers put 263 million bushels of 1959-crop wheat under price support through October 31. This is sharply below the 454 million put under during the same period last year when the crop was 345 million bushels larger than this year. Through November 15, 1957 farmers put 219 million bushels of wheat under price support. Farmers had repaid loans on 7.5 million bushels of 1959-crop wheat by October 31 as against 11 million a year earlier. By the end of October farmers put 26 million bushels of barley under price support which was less than half the 61 million put under by the same date last year. With oats prices above support in most areas farmers put only 6.6 million bushels under support this year as against 48 million last year by the end of October. A little over 12 million cwt. of grain sorghums was under support through October 31 or about a third the quantity a year earlier. Only a small quantity of rye or flaxseed had been put under support due in part to the short crops and relatively high prices. Last year over 6 million bushels of each crop had been put under support by the end of October.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

COMMODITY CREDIT CORPORATION INVENTORY AND SALES

(All data in 1,000 bushels except grain sorghums in 1,000 cwt.)

GRAIN MARKETS LITTLE CHANGED IN SLOW TRADING

Cash grain markets drifted within narrow bounds in slow pre-Thanksgiving trading. Prices, however, closed a little softer for the holiday-shortened week ended November 25.

Winter wheat finished 1-2¢ per bushel higher at Kansas City and Ft. Worth with a steady mill demand and fair export demand for light offerings. Spring wheat was down 2-3¢ and Durum was unchanged to 1¢ lower at Minneapolis with supplies more than ample for present trade needs. Another weakening factor was the nearness of closing of the navigation season from Great Lakes ports. White wheat closed about unchanged at Portland as continued light country selling about matched limited demand and export trade showed a slight improvement. Rye held firm in narrow trading at Minneapolis.

Feed grains weakened slightly, reflecting softness in other grain markets, generally abundant supplies, quiet mixed feed trade, and some doubt about the volume of feed grain exports this winter. Corn closed 1-2¢ per bushel lower. Oats and barley were mostly unchanged to a little weaker. Grain sorghums declined 3-4¢ per cwt. at Kansas City and averaged a little weaker at Ft. Worth. Domestic trading was light and export interest was lacking.

Soybean markets weakened in light trading. Flaxseed showed the sharpest change, dropping 5¢ per bushel at Minneapolis as demand was limited in the face of light offerings.

CANADA'S GRAIN FORECASTS: Canada's November estimates of 1959 grain production call for larger wheat, oats and rye crops than in 1958 but smaller barley and flaxseed crops. On the basis of indicated yields, production of these grains this year, with 1958 totals in parentheses, in million bushels, is as follows: Wheat 413.5 (371.7), oats 417.9 (401.0), barley 225.6 (244.8), rye 8.1 (8.0), and flaxseed 21.3 (22.8). However, harvesting weather this fall has been poor in the Prairie Provinces. A recent survey by the Dominion Bureau of Statistics indicated that some 112 million bushels of wheat, 78 million bushels of oats, 55 million bushels of barley, 8 million bushels of flaxseed, and 366 thousand bushels of rye remained in the fields for harvest. Much of this is expected to stay in the fields over the winter.

GRAIN INSPECTIONS INCREASE: Inspected receipts of corn, grain sorghums and soybeans in the October 1958-September 1959 crop year totaled 1.7 billion bushels, an increase of 8 percent over the previous season. Carlot receipts of corn dropped 6 percent. This was more than offset by increases of over 40 percent in cargo and truck receipts. Carlot receipts of grain sorghums and soybeans last season increased 17 and 21 percent respectively over the previous season. Relatively small quantities of grain sorghums move by our waterways but nearly 24 million bushels moved by truck, or 11 million more than the year before. Movement of soybeans by truck and cargo were each somewhat below the previous season. Details of inspections are shown on pages 7-9 of this report. Since a large portion of the grain moving by truck or barge is not inspected, these figures do not reflect the complete movement.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

GRAIN MARKETS HOLD MOSTLY STEADY

Cash grain markets fluctuated within a narrow range and closed about unchanged for the week ended December 3. Trading was generally quiet.

Wheat markets showed little change at the close, following minor ups and downs during the week. Cash prices were generally above effective support, but this failed to attract any increase in offerings from the country. Demand, however, was not pressing. Export activity provided the main support to the market. Great Lakes navigation came to an end for the season with the last boat going out via the St. Lawrence Seaway and the last barge heading down the river this week. Rye firmed up on light offerings at Minneapolis.

Corn, oats and barley finished the week generally unchanged, with prices a little softer at some markets. Trading was dull. Country marketing of corn and oats remained light. Demand was slow for barley. Grain sorghums strengthened on lighter offerings.

Soybeans showed little change with fairly good demand for limited offerings from the country. Flaxseed lost 5¢ per bushel behind very slow demand in Minneapolis.

Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

1/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

MIXED TREND RULES GRAIN MARKETS

Cash grain markets showed a mixed trend in relatively quiet trading during the week ended December 10. Soybean and rye prices turned downward but grain sorghums edged upward. Prices of other cash grains were little or no different from the previous week's close.

Softness in winter and spring wheat prices was attributed mainly to light mill and export demand. Flour trade was slow and export trade was limited. Interior offerings and country selling continued light as cash prices hung around or just above effective support and some producers were holding. White wheat was unchanged in narrow trading at Portland. Rye followed the futures market down and finished 3¢ per bushel lower at Minneapolis.

Corn prices fluctuated within a narrow range but were generally unchanged for the week. Trading was stalemated to some extent by limited country marketings. Barley and oats held about steady in slow trading. Grain sorghums advanced 2-5¢ per cwt. behind broader demand for smaller offerings.

Soybeans lost 3-4¢ per bushel as losses in the futures market and reports of a number of soybean crushing plants intending to close or shut down more than wiped out early strength generated by a record 8.2 million bushels of soybeans inspected for export last week. Country selling remained light, however, and supply and demand were in a delicate balance. Flaxseed was unchanged in very limited trading at Minneapolis.

| Wheat and flour - export program rates..... | 8 |

SOYBEAN EXPORTS: Inspections of soybeans for export during the week ended December 4 totaled 8.2 million bushels -- the largest quantity inspected in any week on record. This compares with 5.2 million bushels inspected the previous week and 3.0 million a year ago. Of the 8.2 million bushels, 2.2 million went to the Netherlands and 2.3 million to Japan. Exports through Great Lakes ports during the period totaled 865,000 bushels, while Atlantic ports accounted for 2.6 million and Gulf ports 4.8 million bushels. Since the beginning of the season, October 1, 35.8 million bushels of soybeans have been inspected for export, or about 8.4 million bushels more than the 27.4 million inspected during the same period last season.

SOYBEANS WITHDRAWN FROM BARTER LIST: Soybeans acquired under the price-support operation were withdrawn December 5 from the list of commodities available for barter transactions.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

OILSEEDS DOWN - OTHER GRAINS ABOUT STEADY

Soybean and flaxseed markets dropped 5¢ per bushel but other cash grain prices showed little or no change during the week ended December 17. Trading was generally quiet.

Wheat was mostly unchanged at the close of the week. Offerings were light but generally ample for limited domestic and export demand. Rye weakened slightly at Minneapolis as futures prices were off.

Cash corn held about steady with strong demand for relatively light offerings. Oats weakened and barley held generally unchanged in slow trading. Malting barley, however, finished 4¢ per bushel higher on the limited supply of good offerings at Minneapolis. Grain sorghums, bolstered by good demand for light offerings, went up 2-5¢ per cwt. at Kansas City and ruled firm at Fort Worth.

Soybean prices moved within a narrow range early in the week but dropped 5¢ per bushel when news that the 538-million-bushel crop was about 10 million bushels larger than the trade had anticipated it would be. Although country supplies were plentiful, spot offerings were light as farmers were holding tightly. Flaxseed, influenced mainly by the downturn in futures prices, also lost 5¢ at Minneapolis.

| | <u>Page</u> |
|---|-------------|
| Feed grains - payment-in-kind export bids..... | 2 |
| Crop production - annual summary..... | 7 |
| Soybean prices compared with soybean oil and meal prices..... | 8 |

SOYBEAN EXPORTS: Inspections of soybeans for export during the week ended December 11 totaled 6.4 million bushels -- second only to the record 8.2 million bushels inspected the previous week. This compares with 2.9 million a year ago. Of the 6.4 million bushels, 1.4 million went to The Netherlands and 1.6 million to West Germany. Exports to Canada through Great Lakes ports during the period totaled 1.9 million bushels. The Atlantic ports accounted for 359,000 bushels of the total inspected; Gulf ports, 4.1 million bushels. Since the beginning of the season, October 1, 42.2 million bushels of soybeans have been inspected for export, or about 11.9 million bushels more than the 30.3 million inspected during the same period last season. Shipments of soybeans to Canada increased by 1.1 million bushels bringing the total this season to 6.3 million bushels compared with 5.2 million a year ago.

SOYBEAN PRICING POLICY TO CONTINUE: The January-March 1960 minimum selling price for soybeans in Commodity Credit Corporation inventory will be not less than 20 cents per bushel above 1959-crop county price-support rates. This minimum sales price, in effect since October 1, is currently in effect through December. CCC had approximately 14 million bushels of soybeans in noncommitted inventory on December 7. Since June 1, CCC sold approximately 61 million bushels acquired under price-support operations.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

COMMODITY CREDIT CORPORATION INVENTORY AND SALES

WHEAT AND CORN MARKETS STRENGTHEN

Wheat and corn prices edged upward but markets for other cash grains showed little or no change in seasonally slow trading during the week ended December 30.

Winter wheat was about unchanged in the Southwest but went up 1-3¢ per bushel in the Midwest. Spring wheat gained 2¢ while Durum held firm in Minneapolis. White wheat also was about unchanged at Portland. Strength in wheat was attributed mainly to light offerings and anticipation of improved milling and export demand after the turn of the year. Rye held steady at Minneapolis as extremely light receipts found demand lacking.

Corn prices moved up 1-5¢ per bushel as producers continued to hold back offerings in the face of fairly strong industry demand. Oats and barley closed generally unchanged in a typically slow holiday week of trading. Grain sorghums held steady with trading practically at a standstill.

Soybeans and flaxseed closed generally unchanged for the week. Trading was light due to the holidays and continued holding back of offerings by producers.

1/ Carlot receipts have been converted to bushels on the basis that 1 carlot equals 1,750 bushels.

2/ Of the November receipts, 3,200 bushels were Black, 1200 mixed, and the remainder Yellow soybeans. Inspections of soybeans in November included 17,136,932 bushels as cargo lots, 9,619,391 bushels as truck receipts, and the balance as carlot receipts. Based on reports of inspections by licensed grain inspectors at all markets.

1/ Cash grain closing prices are on-track cash prices established at the close of the market. The terminal rate is used in determining the effective support price for grain in terminal storage or in transit to terminal and for calculating most county support rates. Effective support price is the established terminal support rate for grain received by rail minus the deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market, nor for wheat and grain sorghums at Ft. Worth.

2/ Galveston effective and terminal support price. A terminal support price is not established for Ft. Worth, but the cash price usually is backed by paid-in freight which will carry it to Galveston. Therefore, cash prices at Ft. Worth usually may be compared with effective support price at Galveston.

3/ Applies only to the varieties Baart and Bluestem of the sub-class Hard White.

Date of Issue

ACREAGE AND PRODUCTION:

| | |
|---|------------------------------------|
| Crop production - annual summary | Dec. 18 |
| Corn, grain sorghums and soybeans | Nov. 13 |
| Prospective plantings | Mar. 20 |
| Soybeans: Quantity processed by months | Oct. 23 |
| Wheat: Quantity ground for flour by months .. | Aug. 21 |
| Estimated production by States | June 12 |
| Yield and production, all grains | July 17; Aug. 14; Sept.11, Oct. 16 |

EXPORTS (U. S.):

| | |
|------------------|---|
| All grains | Jan. 16; Feb. 13; Mar. 13; Apr. 10; May 1; May 29; June 26; July 31; Sept. 4; Oct. 2; Oct. 30; Dec. 4 |
|------------------|---|

By country of destination:

| | |
|---|-----------------|
| Barley, barley malt, oats, rye and flaxseed..... | Feb. 27; Aug. 7 |
| Corn, grain sorghums and soybeans | May 8; Nov. 6 |
| Wheat and flour | Feb. 27; Aug. 7 |
| Grain products | Aug. 7 |
| Wheat and flour, by months | Aug. 7 |

IMPORTS (U. S.):

| | |
|------------------|--|
| All grains | Jan. 30; Feb. 6; Feb. 20; Mar. 6; Mar. 27; Apr. 17; May 15; June 12; July 17; Aug. 7; Sept. 11; Oct.16; Nov. 6; Dec. 11 |
|------------------|--|

By custom districts:

| | |
|-----------------------------------|--------|
| Wheat, oats, barley and rye | Aug. 7 |
| Grain products | Aug. 7 |

INSPECTED RECEIPTS:

By grades:

Corn Jan. 23, Mar. 20
Soybeans Jan. 23; Feb. 20; Mar. 20; Apr. 23
June 5; July 2; July 31; Aug. 21;
Sept. 18; Oct. 23, Nov. 20; Dec. 31

By classes and grades:

Wheat Feb. 6

Cargo inspected receipts and shipments

by markets:

All grains Aug. 28

Corn, grain sorghums and soybeans Nov. 27

Carlot inspected receipts and shipments

by inspection districts:

All grains Aug. 28

Corn, grain sorghums and soybeans Nov. 27

Trucklot inspected receipts by markets:

All grains Aug. 28

Corn, grain sorghums and soybeans Nov. 27

Cargo, carlot and trucklot inspected

receipts at all points, 1949-59:

All grains Aug. 28

Cargo and trucklot inspected receipts and

shipments at specified markets:

Corn Mar. 20

INSPECTIONS FOR EXPORT:

By country of destination:

Grains: Monthly Jan. 9; Feb. 6; Mar. 6; Apr. 3;
May 8; June 5; July 10; Aug. 7;
Sept. 4; Oct. 9; Nov. 6; Dec. 4

Crop year July 17

Wheat: Monthly Jan. 9; Feb. 6; Mar. 6; Apr. 3;
May 8; June 5; July 10; Aug. 7;
Sept. 4; Oct. 9; Nov. 6; Dec. 4

Crop year..... July 10

Corn, grain sorghums and soybeans Oct. 9

By ports:

Grains: Monthly Jan. 9; Feb. 6; Mar. 6; Apr. 3;
May 8; June 5; July 10; Aug. 7;
Sept. 4; Oct. 9; Nov. 6; Dec. 4

Semi-annual Jan. 9; July 10

Soybeans Oct. 9

By coastal areas and through Great Lakes:

All grains Aug. 14; Sept. 4; Oct. 9; Nov. 6;
Dec. 4

By classes and grades: Wheat Jan. 9; July 10
